Hi Kinga,

Confirmed i will arrange pickup and delivery from my side. Once we are good to ship let me know and I will send back a label for this shipment someone will need to affix it to the package in AMS.

Hi all

The customer is prepaid , so I will be sending the pro forma out .

I just need to know how we are going to proceed with the VAT charge , do I need to add it on to the pro forma ?

The kit is with Harvey in Amsterdam office, but I got the freight QU from Ashley, so I think she will be coordinating from HBY ?

Best regards,
Kinga Lysiak

Subject: RE: RFQ Heliconia - AS350 FMK freight QU 10545

JL/Linda

Part needs to be returned to Dart inventory to be reworked to have the missing parts added back in.

RBEA62309 S111034 has been returned to stock on RA486. Container S121819 has been created. Container serial number has been changed to S111034. Status changed to conditional release.

Part is now stocked and ready to be pulled onto a rework job. If RBEA62309 is a consumable on the rework then someone needs to update the s/n on the final container to reflect S111034.

Once job is completed, part can be system shipped to Kinga's customer once she has her order in the system. This will generate the correct invoice to the end user. CofC should be supplied to whoever physically has the part at the moment so it can go with the shipment.

Kinga

You'll need to coordinate with whoever physically has the part to have it shipped to your customer. Part will need a manual packing slip, commercial invoice and a copy of the CofC.

Jen/Lisa

No excel form created for this one since this is just a paperwork exercise.

Please call with any questions.

Thanks,

SIAN WILLEMS

Importance: High

@Sian,

We have now received the attached email that confirms the customers interest to buy the field maintenance kit that is in Amsterdam. Could you please supply the details to Katherine and Kinga ASAP on how to do the paperwork correctly or traceability.

As mentioned below, Heliconia (CCHAL01) is getting a quote for the field maintenance kit that we sent to Helitech (the one sent on orders 9627 and 10231 (for the short shipped items). How does this all need to happen to keep the proper traceability with the serial number and also to actually make everything balance with finance?

@Warran, I really need your assistance with another complex element related to this order. We knew that this item would remain in Amsterdam after the show so Ashley did her paperwork accordingly. The problem is that DART incurred the following costs:

- VAT: 2158.53 Euros (3217.72 CDN) and 171.82 Euros (256.14 CDN)

How do we need to treat this with the customer so that DART doesn't absorb these fees? I've discussed this with Steve and he mentioned that the customer would've had to paid the VAT anyways if he was buying it from us following regular procedures and that he would then be able to claim it back. We need to ensure that the customer covers these cost and is able to claim them back.

Help please,

Thanks,

Karolanne

Hi Karo,

I am going to ask Sian for some assistance on this one.

Hi Sian,

Here is the email from Karo about the field maintenance kits.

Thanks,

LISA MCMACHEN

Good morning Lisa,

I would need your support here to ensure that we aren't screwing anything up paperwork wise.

So to put you in context, Heliconia (CCHAL01) is getting a quote for the field maintenance kit that we sent to Helitech (the one sent on orders 9627 and 10231 (for the short shipped items). How does this all need to happen to keep the proper traceability with the serial number and also to actually make everything balance with finance?

The field maintenance stayed in Amserdam, fyi.

Thanks for your help,

Karolanne

Hi Kinga,

Karolanne was the person to keep in the loop. Very important. She managed the shipments and work orders for elements that were shipped to the show and she will get in touch with Lisa McMahan to generate the correct paperwork and process with this kit. I've cc'd her.

Thank you!
